## Raw Data

This document contains the raw data that were created by the pink hat segmentation algorithm. The raw data for the fifteen data sets used are shown. The blue and red indicate the $x$ and $y$ co-ordinates of the person being tracked.

## Individual Movements

This document contains the output from the pre-processing stage and the movement detection algorithm. The data for the fifteen data sets used are shown. The blue and red indicate the $x$ and $y$ co-ordinates of the person being tracked. The black areas indicate the individual movements made.

## Event Sequences

This document contains the various event sequences that were generated from the fifteen data sets after graph theoretical clustering had been performed. It is important to note that since each data set was processed separately, events of the same type over different data sets are not necessarily similar. In other words, event $A$ in data set 1 is not necessarily the same event as event $A$ in data set 2 .

Table 16: Various frequent parallel episodes for DATA SET 15 continued

## Serial Rules

This document contains the serial rules that were generated from the fifteen test event sequences. Only rules which have a percentage certainty greater than or equal to fifty percent are shown. Furthermore, rules are only shown if they have occurred at least twice in the event sequence.

| Event <br> Sequence | Next <br> Event | Percentage <br> Certainty | No. <br> Occurrences |
| :---: | :---: | :---: | :---: |
| CAD | A | $100 \%$ | $2 / 2$ |
| AD | A | $100 \%$ | $2 / 2$ |
| BC | A | $100 \%$ | $2 / 2$ |
| CA | D | $67 \%$ | $2 / 3$ |
| C | A | $75 \%$ | $3 / 4$ |
| D | A | $100 \%$ | $3 / 3$ |

Table 1: Various serial rules generated from DATA SET 1

| Event <br> Sequence | Next <br> Event | Percentage <br> Certainty | No. <br> Occurrences |

## Test Results

This document contains the results from the 3 tests performed. Only rules which have a percentage certainty greater than or equal to fifty percent are shown. Furthermore, rules are only shown if they have occurred at least twice in the event sequence.
